## OBJECTIVE

Recent Computer Science graduate with 4+ years of programming experience. seeking to apply my technical expertise and creative problem-solving abilities to support and enhance cutting-edge technology solutions in a collaborative and growth-oriented environment.

## SKILLS

- HTML/CSS
- JavaScript
- PHP
- Microsoft Office (Word, Excel, PowerPoint, Teams)
- Java (OOP)
- SQL
- Flutter
- Firebase

## EDUCATION

**Birzeit University** | *Bachelor of computer science*

*Palestine* | **09.2020 - 07.2024**

- Cumulative **GPA: 84.1**

**Al Qubaiba secondary Girls School** | *Palestinian High School Examination*

**08.2018 – 07.2020**

- Cumulative **GPA: 94.1**

## EXPERIENCE

**Full Stack Web Development Trainee** | *Computer Center (Birzeit university)*

**12.08.2023-17.09.2023**

- Acquired proficiency in:
  - **Frontend Development:** HTML, CSS, JavaScript, jQuery
  - **Backend Development:** PHP
  - **Database Management:** SQL
- I have gained hands-on experience in building full systems, which includes both frontend and backend development, and integrating them with databases.
- Developed a web application designed to simplify the management and organization of football teams and players.
- Developed a web application that allows users to create, manage, and solve quizzes.

## PROJECTS

### Medica App

Medica app (graduation project) is a Palestinian-based medical app designed to streamline scheduling and booking hospital and clinic appointments in the West Bank. It helps users find and book appointments with the best nearby hospitals and doctors. The app is developed using Flutter and Firebase.

### Gym Management System

The Gym Management System simplifies gym operations by managing member and trainer data efficiently. It uses Java for application logic and MySQL for database management.
